Election/Restrictions

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 4-13, 15-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 and by dependence claims 2, 4-13, 15-25 are vague and indefinite in the recitation of "being action-capably adjacent to said gene" since it is unclear what is intended by this phrase. Claim 1 is further vague and indefinite since it is not clear what is intended by the phrase "DNA homologous recombination is occurring at an arbitrary genetic locus" since it is not clear whether it is intended that practicing the method results in the recited recombination, or whether the homologous recombination

occurs and then the method is carried out. It is further unclear what is intended by "a transcription promoter for the transcription of a gene at said genetic locus" since it is not clear whether "for the transcription of a gene at said genetic locus" means a promoter obtained from a gene at said genetic locus, or whether it is intended to mean any promoter placed 5' to, i.e. operably linked to, a gene that is located at said genetic locus. Furthermore, the entire phrase "by controlling the transcription of said gene by placing a transcription promoter for the transcription of a gene at said genetic locus on the downstream 3'side of a base sequence similar to the base sequence of said gene, being action-capably adjacent to said gene, DNA homologous recombination between the base sequence of said gene and a base sequence similar to said gene is induced" is so entirely unclear, that it cannot be determined what is intended.

Claim 1 and by dependence claims 2, 4-13, 15-25 are vague and indefinite in the recitation in claim 1 of the limitation "said gene" in line 4. There is insufficient antecedent basis for this limitation in the claim since there is no earlier recitation of a gene in the claim.
